BOAT SALES

LAKELAND LEISURE ESTATES

Description

Introducing the Lakeland 57, the first model in the exciting new Lakeland range of narrowboats and widebeams. Designed to offer exceptional quality, modern comfort and outstanding value, this beautifully crafted 57ft cruiser stern narrowboat is perfect for those looking to enjoy life on the waterways without compromising on luxury. Built by the renowned Aintree Boats and professionally fitted out by New Concept Boats, the Lakeland 57 combines quality craftsmanship with a high specification throughout, making it ideal as both a stylish holiday cruiser and a comfortable liveaboard.

Stepping aboard, the spacious cruiser stern provides a welcoming and sociable space for cruising or relaxing with family and friends. Comfortable wrap-around upholstered seating offers plenty of room to unwind, while storage lockers beneath keep outdoor equipment and cruising essentials neatly tucked away. A full pram cover with contrast piping provides protection from the elements, allowing the space to be enjoyed throughout the year. The stern also features a Morse control, Barrus Shire deluxe instrument panel, Vetus bow thruster controls, and easy access to the engine compartment and weed hatch.

The popular reverse layout has been carefully designed to make the most of the available space, creating a bright and open interior. Thermal break double-glazed windows and fully glazed side hatches in both the galley and dinette allow plenty of natural light to flood the cabin, while spray foam insulation ensures the boat remains comfortable in every season.

Entering the galley from the stern, you'll find a beautifully designed kitchen finished with elegant quartz worktops and equipped with everything needed for life afloat. It includes an integrated Thetford oven with separate grill, three-burner gas hob, Butler sink with mixer tap, full-size washer-dryer, integrated 70/30 12-volt fridge freezer and built-in coffee machine. A pull-out larder, wine rack, generous cupboards and deep drawers provide excellent storage, making the space as practical as it is stylish.

The L-shaped dinette offers a comfortable place to dine, work or relax while enjoying the views. When additional sleeping space is required, it easily converts into a double bed, allowing the boat to accommodate up to four people. Storage beneath the seating provides additional space for bedding and everyday essentials.

The saloon is warm, inviting and designed for comfort. A 4.5kW Eco Design DEFRA-approved multi-fuel stove sits on a tiled hearth, creating an attractive focal point as well as keeping the cabin cosy during cooler months. Opposite, a contemporary media unit houses a 32-inch Smart TV along with display shelving and useful storage cupboards. Two captain's chairs with matching footstools provide the perfect place to relax and enjoy the ever-changing canal views.

Continuing forward, the walk-through offset bathroom has been finished to a high standard and offers all the comforts of home. It features a spacious 900mm quadrant shower with glazed sliding doors, a stylish raised wash basin set above a vanity unit, a Thetford porcelain cassette toilet, heated towel rail and ceramic tiled flooring, along with plenty of useful storage.

The master bedroom is located at the bow and provides a peaceful retreat after a day on the water. The fixed double bed is fitted with a premium Emma mattress and benefits from generous storage beneath. A full-height double wardrobe, corner cupboard and overhead lockers provide ample storage, while a 24-inch Smart TV completes this comfortable and well-designed space.

The Lakeland 57 also boasts an impressive electrical system designed for both marina life and extended off-grid cruising. Three 215-watt solar panels work alongside a Victron MPPT controller and Victron 3kW MultiPlus inverter charger to provide reliable onboard power. A Victron Cerbo monitoring system allows you to easily check battery performance along with water and fuel levels, while USB charging points, shoreline connection and integrated 4G/5G Wi-Fi capability ensure you're always connected. The system is supported by two 230Ah AGM domestic batteries, together with dedicated starter and bow thruster batteries, and includes a galvanic isolator for added protection.

Power comes from the reliable Barrus Shire 40hp diesel engine paired with a PRM 150 D2 gearbox, delivering smooth and dependable cruising performance. With commissioning hours only, the engine is effectively brand new, while the fitted Vetus electric bow thruster makes manoeuvring and mooring straightforward.

Designed for year-round comfort, hot water is supplied via the engine calorifier, a 1kW immersion heater or the fitted 5kW Webasto diesel heating system. Combined with the multi-fuel stove, spray foam insulation and thermal break double glazing, the Lakeland 57 offers a warm and comfortable environment whatever the season.

Built with a robust 10:6:5:4 steel hull, the boat has been professionally protected from new with a two-pack Hempel epoxy coating, followed by four coats of Hempel protective paint and four sacrificial anodes. A 400-litre stainless steel water tank and 200-litre fuel tank provide excellent capacity for extended cruising.

As a brand-new vessel, the Lakeland 57 is fully compliant with RCD/RCR regulations and benefits from certification for the first four years from new. Combining quality construction, thoughtful design and an impressive level of specification, the Lakeland 57 is a fantastic choice for anyone looking to enjoy comfortable, modern living on the water.
